Yamaha Motif X7 Case

# **Why Choose Stage Plus Flight Cases?**

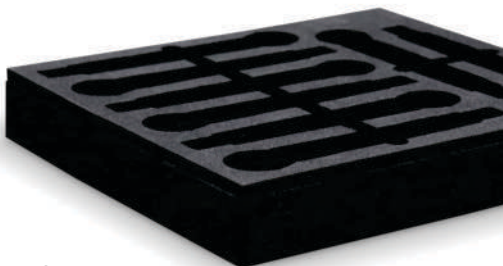

Pioneer DJ 2x CDJ-2000 & DJM-900

## Quality Construction & Materials.

Stage Plus Flight Cases can be made from different external and internal materials, depending on your application and requirements, from different wood thicknesses and panel properties to padding, foams and interior protection. We pride ourselves in delivering cases to the highest quality industry standard, that's why we have partnered with the world's leading flight case hardware suppliers.

## Custom Foaming.

Stage Plus use a resilient and flexible closed-cell polyethylene foam with durability that makes it ideal for protecting any object as it can handle repeated shocks and impacts. This foam can be easily cut out to fit and protect your equipment.

## ✔ Virtual Cases.

All our flight cases are carefully designed beforehand in 3D cad software, to avoid constant correction and guarantee customer satisfaction. All our designs are sent to you to be approved before commencing production.

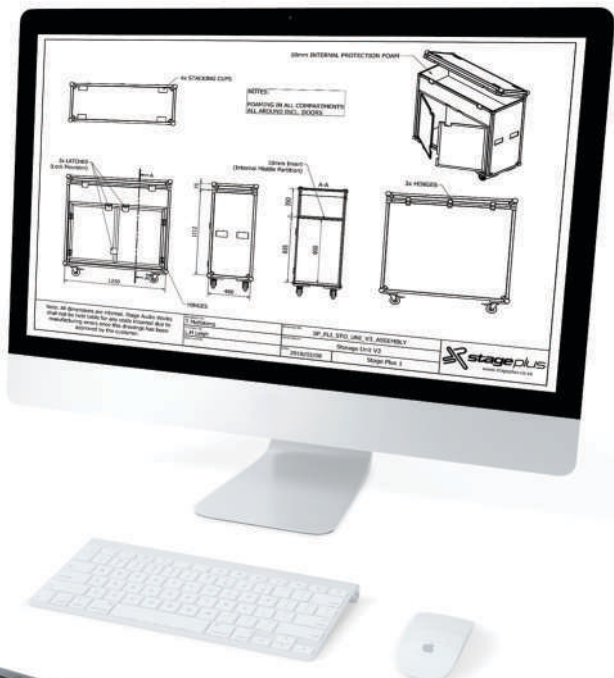

## ✔ Brand Your Case.

With CNC precision cutting we can engrave your company logo on almost any flight case, to better expose your company and brand.

We also offer custom flight case tour labels on request with orders greater than 100 units.

12U Shock Mount (Case in Case)

Stage Plus Numberplate

## Colour Options.

We have 5 colour options within the colour case range. This is great for colour coding your equipment.

Our specially sourced European Birch plywood is overlaid with a phenolic film on both surfaces. The top surface has a wire mesh pattern and the reverse surface is smooth. The surface has a high wear resistance, decorative appearance and is easy to clean.

## Lightweight Options.

Our light weight cases incorporate Penn Elcom's Flight Panel™, a polypropylene board with toughened surface for trunks and larger cases. The flight panel reduces case weight by up to 40%. The new light weight range of cases also includes a unique ABS flip handle from Penn Elcom.

- Flight Panel™ – light weight polypropylene board
- Reduces case weight by up to 40%
- 4 Colours to choose from

**\* Less weight means less transport costs.**

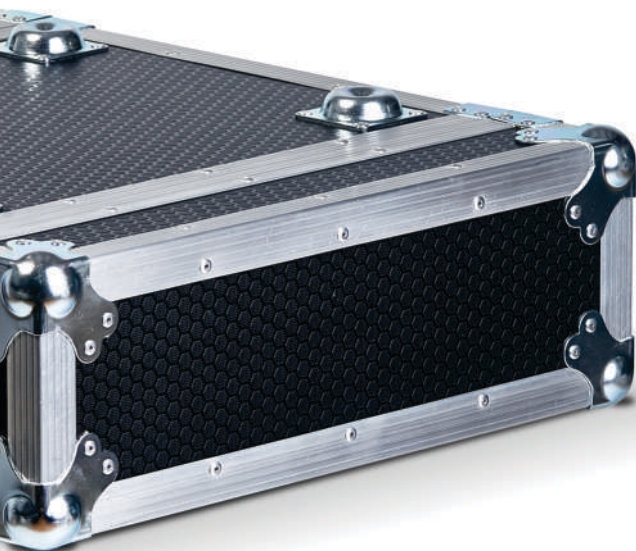

3U Amp Deep Rack Case

Universal Briefcase

## Aluminium Cases.

Constructed out of locally produced deep-textured ("rigidized") aluminium, these custom made protective cases are ideal if you are looking a hard wearing and lightweight alternative to the traditional wooded flight case.

Our aluminium cases are incredibly durable and can be foam lined, foam filled or we can tailor make an insert to suit

## Padded Bags.

Our Stage Plus padded bags are made from 600 Denier nylon fabric for superior strength, keeping your equipment scratch proof! Each bag we make is durable, extremely hard-wearing and weather-resistant. Our manufacturing process ensures that your padded bag will be perfectly suited to your specific needs.

Custom Foamed Explorer Case EXP-5326  
for the DJI Phantom Drone

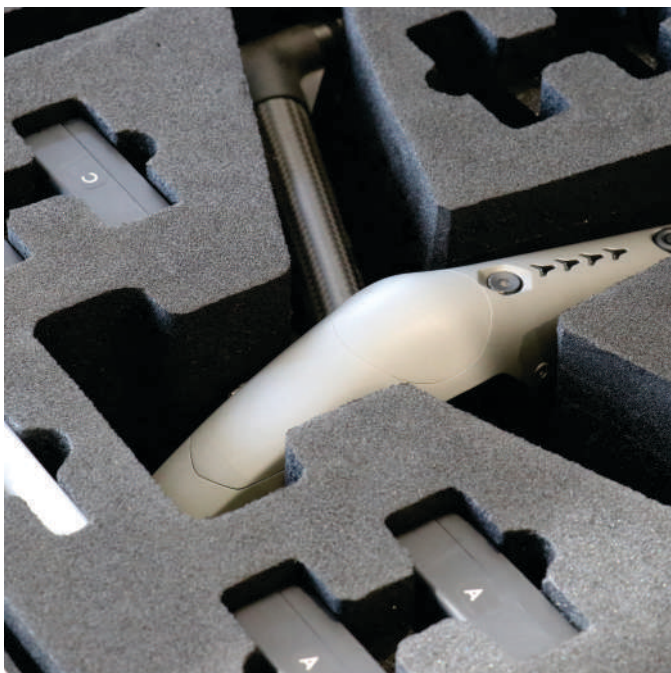

## Explorer Cases.

Explorer Cases are 100% Made in Italy and are virtually indestructible, extremely resistant to weather conditions, waterproof, shockproof, and dustproof. They are realized with the most innovative copolymer Polypropylene compound to grant the safe transportation for all your equipment.
